

HYBRID ADVANTAGES

- Performs best in zone and north
- Great fall intactness
- Higher populations lead to optimum yields
- Excellent tolerance to Goss's Wilt

POSITIONING & MANAGEMENT

LR 5546 is an Agrisure Viptera 3220 EZ Refuge hybrid that performs best in zone and north. The stalks and roots are rated good and the fall intactness is very good but the yield potential of this line should make you want to harvest early to avoid leaving anything in the field. It is ideally suited for higher populations and top-end management. Excellent tolerance to greensnap.

Highly Productive & Irrigated Fields	High Population Recommended
Moderately Productive/Average Fields	Medium Population Recommended
Less Productive/Stressed Fields	Low Population Recommended
