

POSITIONING & MANAGEMENT

You wanted the best, you got the best. Ironclad, Peking SCN protection and yield will make L2391 E3 the most sought after variety in the area. Dual Phytophthora Root Rot genes and superior field tolerance make it the top choice for early planting. Superior Sudden Death Syndrome tolerance creates an early group two variety that will move south. Coupled with excellent Iron Deficiency Chlorosis and Sclerotinia White Mold tolerances, this is a must have variety.
