## POSITIONING & MANAGEMENT

This Ironclad, Peking source SCN variety is a must plant in the late group one areas. The medium-tall plant height and excellent emergence give L 1721 E3 the edge in stress environments. Standability is no concern and excellent Iron Deficiency Chlorosis puts growers mind at ease throughout the entire growing season. The Rps1k Phytophthora Root Rot gene provides the cherry on top of L 1721 E3s defensive package.
