POSITIONING & MANAGEMENT

This new Peking Soybean Cyst Nematode (SCN) product combines monster yields with great defense. L2261 E3 is a medium-tall plant and strong field tolerance to Phytophthora Root Rot (PRR). This product can be used in Southern Minnesota all the way into Central Iowa with excellent stress resistance and strong emergence in the spring. This soybean handles stress well. Performing at 110% of Trial Mean in low-yield environments. You can place this soybean on those more challenging acres.
